

Verismo Networks' Cloud-based Managed Services Named Finalist for TelcoTV 2011 Vision Award

*Verismo's Proven End-to-End Broadband TV Platform Enables Service Providers Globally to Innovate,
Differentiate and Rapidly Expand Footprint at Low Cost*

New Orleans, LA – October 25, 2011 – TelcoTV, the largest video conference and expo focused on the U.S. service provider market, today revealed that [Verismo Networks](#) is a finalist in the 'Innovation in Middleware' category for the fourth annual TelcoTV Vision Awards. Verismo joins the industry's leading video service providers, technology manufacturers and equipment vendors and all have demonstrated outstanding innovation and leadership.

[Verismo Networks](#) is also showcasing its award-winning end-to-end connected TV solution at the TelcoTV 2011 conference.. Verismo's Cloud-based middleware tools and services manage the delivery of high quality content from the cloud to the consumer's TV. Verismo's Client Solutions include the Verismo IP set-top box, DVR and media gateway that bring a holistic connected TV experience that supports content from Live TV, Video-on-Demand, Internet OTT or Home Media USB/DLNA.

"We are pleased that our Cloud based Managed Services has been chosen as one of the TelcoTV 2011 Vision Award finalists," said Prakash Bhalerao, CEO at [Verismo Networks](#).

The Verismo Networks' Cloud-based Managed Services include:

- Meta data aggregation
- Set-top Box & User Management
- Content & Channel Management
- Geo Targeting
- Subscription & Billing
- DRM configuration
- User Interface Management
- Network Monitoring
- Analytics
- Advertising
- XML API for multi-screen delivery
- 24/7 customer support & Network Operation Center
- Multiple POPs in USA, Europe, Asia and CDN support across the world

The Verismo Networks advanced IP set-top box includes:

- Full HD 1080p Multi-format media player
- Live TV, OTT and Video-on-demand
- TV friendly UI with EPG mode
- DVR for Time-shifted viewing
- Advanced codecs, DRM & encryption support
- Adaptive Streaming (HLS)
- HTML5 Browser for Internet Apps
- Unicast or Multi-cast (IGMP v2/3)
- Home Media (DLNA server or USB)
- Wired & Wireless Connectivity (Ethernet, 802.11n Wi-Fi or 3G)
- Stylish, compact design

The Verismo Media Gateway is a whole home solution that enables triple play services on top of the set-top box features:

- Whole House DVR
- Multi room streaming with Verismo or third party clients
- Home networking integration options (MoCA or other)
- Triple Play services - video, voice (VoIP) and data router functionality.
- Dual Broadcast tuners (DVB or ATSC)
- Integrated 802.11n Wi-Fi
- Integrated HDD for DVR
